Help bring light to the darkness...

By conservative estimates there are over forty million blind people in the world today. Yet two-thirds of the blindness could have been prevented or could be treated now if the resources were available.

World Blindness Outreach is a humanitarian organization created to support the volunteer efforts of dedicated doctors, nurses, and technicians whose missions to countries around the world are helping people suffering from preventable or curable blindness.

Members of World Blindness Outreach have personally taken part in past missions to the Philippines, Nigeria, Brazil, Mexico, India, Belize, Peru, Ukraine, China, Egypt, Vietnam, El Salvador, Ecuador, Nicaragua, Dominican Republic, Guyana, Argentina, and Guatemala. They have performed several thousand successful operations that have made a difference in countless lives. World Blindness Outreach is raising funds to purchase microscopes, surgical instruments and other equipment and supplies, to be used during missions and some to be left behind with the mission-trained doctors in the countries visited.

You can see the world in all its splendor. Imagine what it would be like to be without that ability. Your generous support of World Blindness Outreach helps to bring light where now there is darkness. You are indeed restoring hope and dignity to the lives of countless unfortunate people around the world.

Cordially,

Albert A. Alley, M.D.
